HONEYWELL BROADENS GLL LIMIT SWITCH PRODUCT LINE

Slow Action Circuitry, New Actuator Styles Added

MINNEAPOLIS, June 11, 2007 – Honeywell (NYSE: HON) today expanded its GLL series of limit switch line to better serve the industrial segment. The GLL Series debuted in 2006, and is now being expanded with three new actuator styles and slow action circuitry.

The additional options include slow action and stealth action circuitry as well as three new actuator styles for versatility: side-rotary with rod actuator, horizontal roller lever and vertical roller lever. This expansion gives Honeywell Sensing and Control customers their choice of an entire product line of low-cost switches available to solve their application needs.

Potential applications may include packaging machinery, material handling, elevators, aerial lifts and surtran applications.
