## **HONEYWELL INTRODUCES LCD MAINTENANCE/HOUR METERS**

### ***New Electronic Meters Feature Maintenance Indicator, Internal Battery for Constant Readability***

MINNEAPOLIS, July 9, 2007 – Honeywell (NYSE: HON) today introduced its LCD Maintenance/Hour Meters with an available 50-hour maintenance meter and large digital display that is readable at all times.

The meters feature snap-in installation, fitting into a rectangular panel opening and mounts using self-contained clips. An integral terminal connector reduces line errors due to polarity issues, speeding up assembly time for OEMs.

This meter has an internal battery to power the display, making it viewable even when the meter is not accumulating hours.

Potential applications may include lawn and garden equipment; commercial sprayers; turf management and sport field/grounds maintenance equipment; golf carts; small-engine vehicles; portable generators, compressors; welders; snow blowers, log splitters; sport vehicles; snowmobiles; and ATVs.
