HONEYWELL EXPANDS OEM LIMIT SWITCH SET WITH 91MCE SERIES SWITCHES

Miniature Switches Designed with Industry-Standard Footprint for Ease of Installation

MINNEAPOLIS, July 9, 2007 – Honeywell (NYSE: HON) today introduced the 91MCE Series of miniature limit switches. With its miniature package size and smaller footprint, the 91MCE series, is designed to fit into applications where space is limited. Its 20mm mounting pattern meets most globally accepted mounting standards, thereby increasing ease of installation into existing applications. Potential applications may include scissor and aerial lifts, machine equipment and material handling.

This miniature switch is an addition to the Original Equipment Manufacturer (OEM) set of high-quality cost-efficient limit switches and is available in a range of options to help customers find the right solution for their application. Engineering support is available to spec into new designs.
