

## 20PC Family Pressure Sensors

### Ratiometricity for 20PC Output

Technical Note

#### BACKGROUND

The 20PC series are considered ratiometric meaning the output signal is proportional to the supply voltage.

#### PURPOSE

Specifications in the product sheet such as Span, Sensitivity, etc. are defined when using typical

excitation voltage of 10 Vdc. Therefore, an output curve can be drawn as shown in Figure 1.

For any specific listing, the slope of the line is determined by excitation voltage. For example, for a 5 psi unit, the full scale output will be 50 mV at 10 Vdc excitation voltage and 80 mV at 16 Vdc excitation voltage.

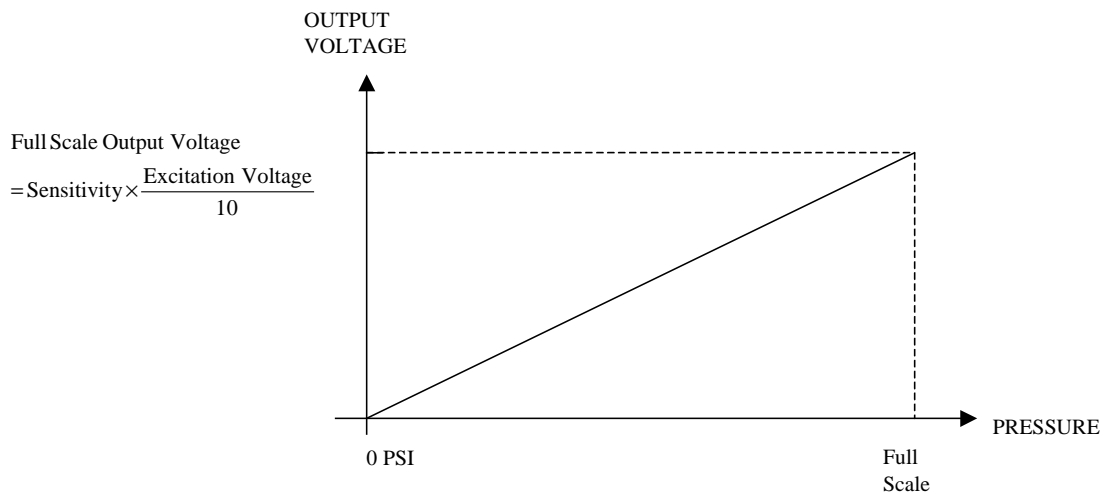

Figure 1 Output Curve

## WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. The foregoing is Buyer's sole remedy and is **in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose.**

For application assistance, current specifications, pricing, or name of the nearest Authorized Distributor, contact a nearby sales office. Or call:  
1-800-537-6945 USA  
1-800-737-3360 Canada  
1-815-235-6847 International
