Quick Start Guide

Please power off the computer before connecting the scanner, and then power on the computer after the scanner is fully connected.

Power Adapter (if included)

Note: Please refer to the user guide for the information on the cleaning equipment.

USB Connection

RS232 Connection

Reading Skills

- To acquire a good reading effect, the scanner center shall be aligned to the barcode, but the alignment can be made at any direction to facilitate reading.
- When the scanner aligns to the barcode, the scanner shall be close to the barcode if the barcode is too small; if the barcode is large, the scanner shall be slightly away from the barcode, so that the scanner can more easily read the barcode.
- If the reflectance on the surface of barcode is high (e.g., film coating), you may need to incline the scanner at an angle, so that the scanner can more easily read the barcode.

Factory Default Recovery

Scan the barcode below to fully recover the scanner to the factory default state.

Indicator Setting

Enter/Tab Setting

By scanning the barcode below, you can configure the scanner’s indicator to turn on or off (decoding is activated when the scanner detects the barcode).
