**High Sensitivity Latching Digital Hall-effect Sensor ICs: SS360NT, SS360ST, SS360ST-10K, SS460S, SS460S-T2, SS460S-T3, SS460S-LP**

**DESCRIPTION**

The SS360NT, SS360ST, SS360ST-10K, SS460S, SS460S-T2, SS460S-T3, and SS460S-LP High Sensitivity Latching Digital Hall-Effect Sensor ICs are small, sensitive and versatile devices that are operated by the magnetic field from a permanent magnet or an electromagnet. They are designed to respond to alternating North and South poles. The SS360NT is turned on by a North pole while the SS360ST, SS460S, SS460S-T2, SS460S-T3, and SS460S-LP are turned on by a South pole. These sensor ICs offer reliable switching points with a high magnetic sensitivity of 30 G typical (55 G maximum). They do not use chopper stabilization on the Hall element, providing a clean output signal and a faster latch response time when compared to competitive high sensitivity Hall-effect latching sensor ICs which do use chopper stabilization. These products offer reverse polarity protection, deliver a stable output over a -40°C to 150°C temperature range, and can accept any dc supply voltage from 3 Vdc to 24 Vdc. For brushless dc motor manufacturers who need latching sensors with reliable, consistent performance for more efficient and smaller designs, Honeywell’s High Sensitivity Hall-Effect Latching Digital Sensor ICs respond to low magnetic fields and offer consistent repeatability while delivering faster response times to a change in magnetic field for better motor efficiency.

These products are available in five package styles:
- **SS360NT, SS360ST, SS360ST-10K**: SOT-23 surface-mount package, pocket tape and reel
- **SS460S**: Flat TO-92-style with straight standard leads, bulk package
- **SS460S-T2**: Flat TO-92-style with formed leads, ammopack tape-in-box
- **SS460S-T3**: Flat TO-92-style with straight standard leads, ammopack tape-in-box
- **SS460S-LP**: Flat TO-92-style with straight, long leads, pocket tape and reel

**FEATURES**

- Fastest response time in its class
- No-chopper-stabilization
- High sensitivity
- Latching magnetics
- Wide operating voltage range of 3 Vdc to 24 Vdc
- Built-in reverse voltage
- Durable design
- RoHS-compliant material meets Directive 2002/95

**POTENTIAL APPLICATIONS**

**Industrial/commercial**
- Brushless dc motor commutation
- Speed and RPM sensing in electric motors and fans
- Tachometer, counter pickup
- Robotics control
- Flow-rate sensing for appliances

**Transportation**
- Brushless dc motor commutation
- Electronic window lift, anti-pinch power window systems
- Vehicle convertible roof position

**Medical**
- Medical equipment using electric motors

**PORTFOLIO**

The SS360NT, SS360ST, SS360ST-10K, SS460S, SS460S-T2, SS460S-T3, SS460S-LP are a part of Honeywell’s family of Latching Digital Hall-effect Sensor ICs which also include:
- **VF360NT, VF360ST, VF460SP**
- **SS360PT, SS460P, SS460P-T2**
- **SS361CT, SS461C**
- **SS361RT, SS461R**
- **SS400 Series, SS500 (select catalog listings)**
- **VF526DT (dual outputs)**

</tbody>
</table>

NOTICE
These Hall-effect sensor ICs may have an initial output in either the ON or OFF state if powered up with an applied magnetic field in the differential zone (applied magnetic field $>Brp$ and $<Bop$). Honeywell recommends allowing $10 \mu s$ after supply voltage has reached $5$ V (SS360NT, SS360ST, SS360ST-10K) or $3$ V (SS460S, SS460S-T2, SS460S-T3, SS460S-LP) for the output voltage to stabilize.

NOTICE
The magnetic field strength (Gauss) required to cause the switch to change state (operate and release) will be as specified in the magnetic characteristics. To test the switch against the specified limits, the switch must be placed in a uniform magnetic field.

CAUTION ELEetroSTATIC SENSITIVE DEVICES DO NOT OPEN OR HANDLE EXCEPT AT A STATIC FREE WORKSTATION

ESD SENSITIVITY: CLASS 3a

NOTICE
Absolute maximum ratings are the extreme limits the device will momentarily withstand without damage to the device. Electrical and mechanical characteristics are not guaranteed if the rated voltage and/or currents are exceeded, nor will the device necessarily operate at absolute maximum ratings.

**Warranty/Remedy**

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell’s standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. The foregoing is buyer’s sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

---

**WARNING**

**PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

**WARNING**

**MISUSE OF DOCUMENTATION**

- The information presented in this datasheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.
