

# value-added solutions

## **Hands-in solutions with no labor required!**

Improve your time to market and lower your total system costs with a Honeywell Sensing and Control value-added pressure and thermal solution. We customize integrated assemblies, thermal management, packaging and termination so you don't have to. Get exactly what you need to deliver your products to market faster, saving labor and design time too.

**Value-added solutions from Honeywell.**

**We're not just hands-on, we're hands-in.**

## **Honeywell**

## Features and Benefits

- Up-front and ongoing technical support throughout the process
- Adding value by tailoring solutions to specific application needs
- Building value-added solutions on highly reliable, proven and accurate sensing platforms you can trust
- Responsive quoting and rapid prototyping processes to meet demanding deadlines
- Velocity product development enables built-in quality, reliability, and repeatability

## Value to Customers

- Improved time to market
- Reduced production cycle time
- Reduced design time
- Lower total system costs
- Single source supplier
- Improved reliability
- Honeywell tested and warranted sub-assemblies
- Simplified qualification and manufacturing

## Potential Applications

### Medical

- Respiratory
- Dialysis machines
- Medical diagnostics
- Hospital hardware (lab equipment to incubators)
- Infusion pumps

### Industrial

- Valves and flow meters
- Energy and power
- HVAC and refrigeration
- Embedded machine
- Material handling
- Oil and gas
- Air compressors

## We're hands-in so you can be hands-off!
