
Environmental Monitors “Gas Sniffer”

MASS AIRFLOW
AP 00079

PRODUCT

AWM3300, AWM3100V

APPLICATION DESCRIPTION

Gas detectors are used to check work environments for a wide variety of noxious, poisonous or combustible gases. The equipment can be portable (hand held or belt worn) or a fixed system monitoring multi-locations. The gas detectors provide continuous monitoring/readout and are set to trigger visual and audible alarms if safe gas concentration levels are exceeded. The diagram shows the microbridge function.
